

Name: Class:

Related addition and subtraction sentences

Solve the following. (follow the example).

If → $5 + 2 = 7$

Then → $7 - 5 = 2$

If → $2 + 2 = 4$

Then → $4 - \dots = 2$

If → $10 + 2 = 12$

Then → $12 - \dots = 10$

If → $7 + 3 = 10$

Then → $10 - \dots = 7$

If → $9 + 6 = 15$

Then → $15 - \dots = 9$

If → $3 + 9 = 12$

Then → $12 - \dots = 3$

If → $5 + 5 = 10$

Then → $10 - \dots = 5$

If → $5 + 6 = 11$

Then → $11 - \dots = 6$

If → $17 + 2 = 19$

Then → $19 - \dots = 2$

If → $13 + 5 = 18$

Then → $18 - \dots = 5$

If → $16 + 3 = 19$

Then → $19 - \dots = 16$

If → $7 + 9 = 16$

Then → $16 - \dots = 9$

Related addition and subtraction sentences

Solve the following. (follow the example).

If $\xrightarrow{\quad}$ $5 + 2 = 7$

Then $\xrightarrow{\quad}$ $7 - 5 = 2$

If $\xrightarrow{\quad}$ $2 + 2 = 4$

Then $\xrightarrow{\quad}$ $4 - 2 = 2$

If $\xrightarrow{\quad}$ $10 + 2 = 12$

Then $\xrightarrow{\quad}$ $12 - 2 = 10$

If $\xrightarrow{\quad}$ $7 + 3 = 10$

Then $\xrightarrow{\quad}$ $10 - 3 = 7$

If $\xrightarrow{\quad}$ $9 + 6 = 15$

Then $\xrightarrow{\quad}$ $15 - 6 = 9$

If $\xrightarrow{\quad}$ $3 + 9 = 12$

Then $\xrightarrow{\quad}$ $12 - 9 = 3$

If $\xrightarrow{\quad}$ $5 + 5 = 10$

Then $\xrightarrow{\quad}$ $10 - 5 = 5$

If $\xrightarrow{\quad}$ $5 + 6 = 11$

Then $\xrightarrow{\quad}$ $11 - 5 = 6$

If $\xrightarrow{\quad}$ $17 + 2 = 19$

Then $\xrightarrow{\quad}$ $19 - 17 = 2$

If $\xrightarrow{\quad}$ $13 + 5 = 18$

Then $\xrightarrow{\quad}$ $18 - 13 = 5$

If $\xrightarrow{\quad}$ $16 + 3 = 19$

Then $\xrightarrow{\quad}$ $19 - 3 = 16$

If $\xrightarrow{\quad}$ $7 + 9 = 16$

Then $\xrightarrow{\quad}$ $16 - 7 = 9$
