

Name: ..... Class: .....

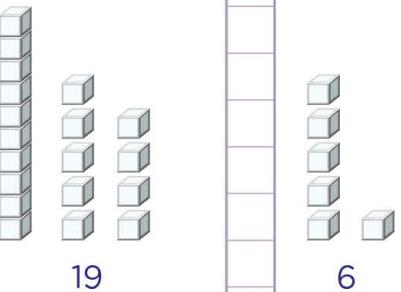

Adding 2-digits numbers and 1-digit numbers without regrouping using models

1. Add 63 and 5 using the model below.

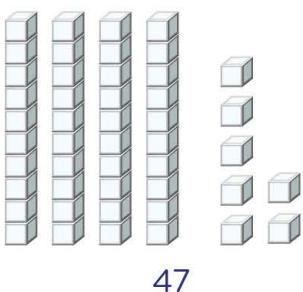

$63 + 5 = \underline{\hspace{2cm}}$

4. Add 19 and 6 using the model below.

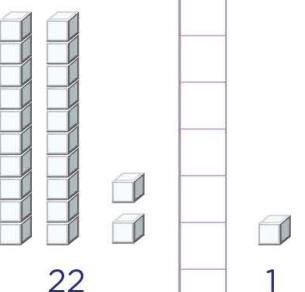

$19 + 6 = \underline{\hspace{2cm}}$

2. Add 47 and 2 using the model below.

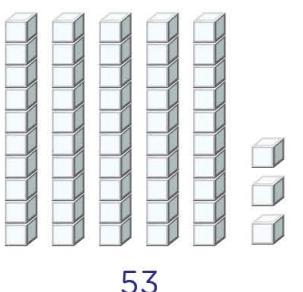

$47 + 2 = \underline{\hspace{2cm}}$

5. Add 22 and 1 using the model below.

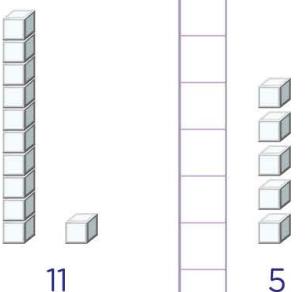

$22 + 1 = \underline{\hspace{2cm}}$

3. Add 53 and 8 using the model below.

$53 + 8 = \underline{\hspace{2cm}}$

6. Add 11 and 5 using the model below.

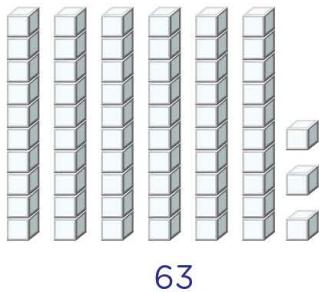

$11 + 5 = \underline{\hspace{2cm}}$

# Solution

Name: ..... Class: .....

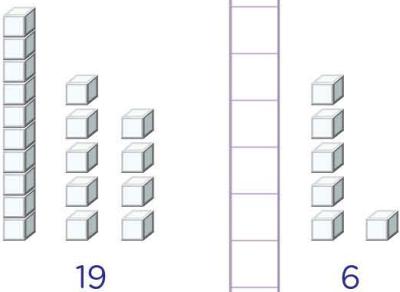

Adding 2-digits numbers and 1-digit numbers without regrouping using models

1. Add 63 and 5 using the model below.

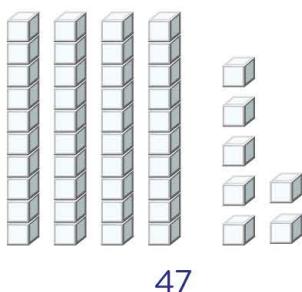

$$63 + 5 = \underline{\quad 68 \quad}$$

4. Add 19 and 6 using the model below.

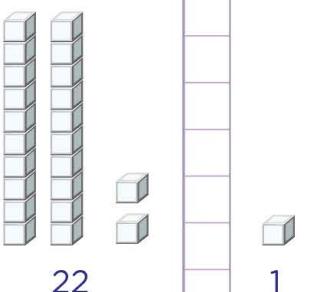

$$19 + 6 = \underline{\quad 25 \quad}$$

2. Add 47 and 2 using the model below.

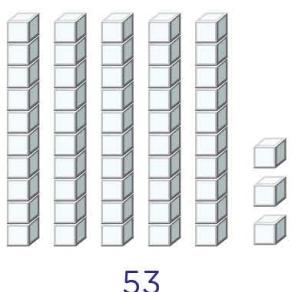

$$47 + 2 = \underline{\quad 49 \quad}$$

5. Add 22 and 1 using the model below.

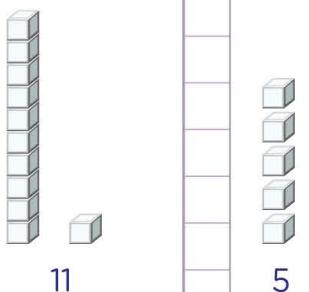

$$22 + 1 = \underline{\quad 23 \quad}$$

3. Add 53 and 8 using the model below.

$$53 + 8 = \underline{\quad 61 \quad}$$

6. Add 11 and 5 using the model below.

$$11 + 5 = \underline{\quad 16 \quad}$$
