How to find the area of rectangles and squares

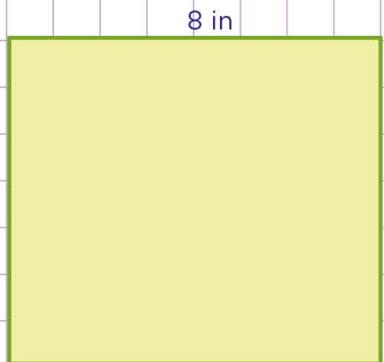

1. Find the area of the rectangle below.

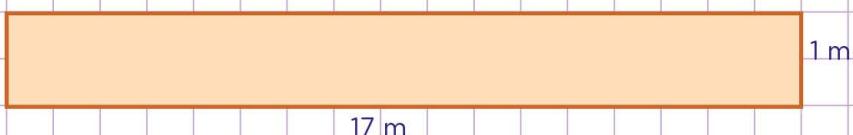

2. Find the area of the square below.

3. Find the area of the rectangle below.

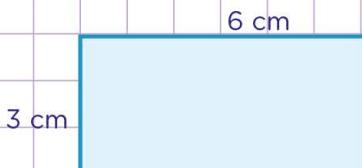

4. Find the area of the rectangle below.

Name: ..... Class: .....

## How to find the area of rectangles and squares

1. Find the area of the rectangle below.

Length = 6 cm

Width = 3 cm

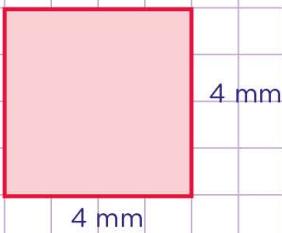

$$\text{Area} = \text{length} \times \text{width}.$$

$$= 6 \text{ cm} \times 3 \text{ cm}$$

$$= 18 \text{ cm}^2$$

So, Area = 18 square centimeters.

2. Find the area of the square below.

Side = 4 mm

side = 4 mm

$$\text{Area} = (\text{side} \times \text{side}).$$

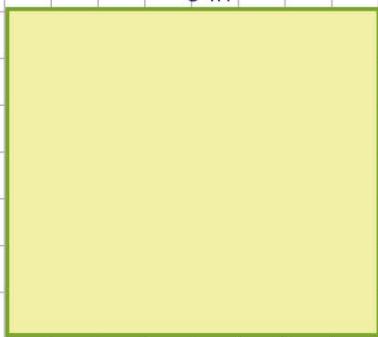

$$= 4 \text{ mm} \times 4 \text{ mm}.$$

$$= 16 \text{ mm}^2$$

So, Area = 16 square milliliters.

3. Find the area of the rectangle below.

8 in

Length = 8 in

Width = 7 in

$$\text{Area} = \text{length} \times \text{width}.$$

$$= 8 \text{ in} \times 7 \text{ in}$$

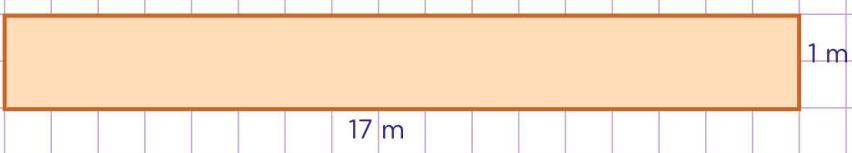

$$= 56 \text{ in}^2$$

So, Area = 56 square inches.

4. Find the area of the rectangle below.

17 m

Length = 17 m Width = 1 m

$$\text{Area} = \text{length} \times \text{width}.$$

$$= 17 \text{ m} \times 1 \text{ m}$$

$$= 17 \text{ m}^2$$

So, Area = 17 square meters.
