Subtract: fill in the missing digits

Calculate and fill in the missing digits (tick the correct answer)

a.

$$\begin{array}{r} \square 5 \square 27 \\ - 425 \square 5 \\ \hline \square \square \square \square \square \end{array}$$

b.

$$\begin{array}{r} 79052 \\ - 44 \square \square 3 \\ \hline \square 4379 \end{array}$$

☐ 7, 4, and 3

☐ 7, 6, and 3

☐ 5, 6, and 3

c.

$$\begin{array}{r} \square 17103 \\ - 28 \square 57 \\ \hline \square 8746 \end{array}$$

☐ 3, 2, and 8

☐ 3, 1, and 7

☐ 3, 1, and 8

d.

$$\begin{array}{r} 27 \square 0620 \\ - 19143 \square 0 \\ \hline \square 866240 \end{array}$$

☐ 8, 6, and 0

☐ 8, 8, and 0

☐ 8, 4, and 0

e.

$$\begin{array}{r} \square 6 \square 8325 \\ - 3660216 \\ \hline 9 \square 8109 \end{array}$$

☐ 2, 6, and 4

☐ 2, 5, and 7

☐ 2, 6, and 1

Subtract: fill in the missing digits

Calculate and fill in the missing digits (tick the correct answer)

a.

$$\begin{array}{r} \square 5 \square 2 7 \\ - 4 2 5 \square 5 \\ \hline 1 2 8 9 2 \end{array}$$

First of all let's subtract normally from right to left.

$$7 - 5 = 2$$

Secondly to the tens place since $2 - \square = 9$, so, think of a number that when we subtract from 2 will make the answer end with 9.

You see that, if we borrow 1 from the next digit and add to 2 to make 12, then, $12 - \square = 9$.

Next, to the hundreds place let's think of a number that if we subtract 5 from we will make the answer end with 8. So, the missing number might be 3 since $13 - 5 = 8$

But remember that we borrowed 1 from this number \square to add to the previous number(2).

So, the actual missing number here is $1 + 3 = 4$

Next, to the thousands place we have $4 - 2 = 2$ since we removed 1 from 5 to add to the previous number.

Finally, at the ten-thousands place let's think of a number that when we subtract 4 from, will make the answer end with 1

We know that $5 - 4 = 1$

So, the missing number is 5.

Therefore, the missing digits are

$$\begin{array}{r} 6 5 4 2 7 \\ - 4 2 5 3 5 \\ \hline 1 2 8 9 2 \end{array}$$

b.

$$\begin{array}{r} 7 9 0 5 2 \\ - 4 4 \square \square 3 \\ \hline \square 4 3 7 9 \end{array}$$

☐ 7, 4, and 3

☒ 7, 6, and 3

☐ 5, 6, and 3

c.

$$\begin{array}{r} \square 1 7 1 0 3 \\ - 2 8 \square 5 7 \\ \hline \square 8 7 4 6 \end{array}$$

☐ 3, 2, and 8

☐ 3, 1, and 7

☒ 3, 1, and 8

d.

$$\begin{array}{r} 2 7 \square 0 6 2 0 \\ - 1 9 1 4 3 \square 0 \\ \hline \square 8 6 6 2 4 0 \end{array}$$

☐ 8, 6, and 0

☒ 8, 8, and 0

☐ 8, 4, and 0

e.

$$\begin{array}{r} \square 6 \square 8 3 2 5 \\ - 3 6 6 0 2 1 6 \\ \hline 9 \square 8 1 0 9 \end{array}$$

☒ 2, 6, and 4

☐ 2, 5, and 7

☐ 2, 6, and 1
